Milestone 1 — User Authentication Module

Infosys Springboard Internship 7.0 · Batch 4

About

A user authentication app built with Streamlit. Users can sign up, log in, and reset a forgotten password. An admin can log in separately to see all registered users.

Features

- Login and Signup with field validation
- Forgot Password using Security Question or Email OTP
- JWT-based session handling
- User Dashboard with Logout
- Admin Dashboard showing the list of users

Tech Stack

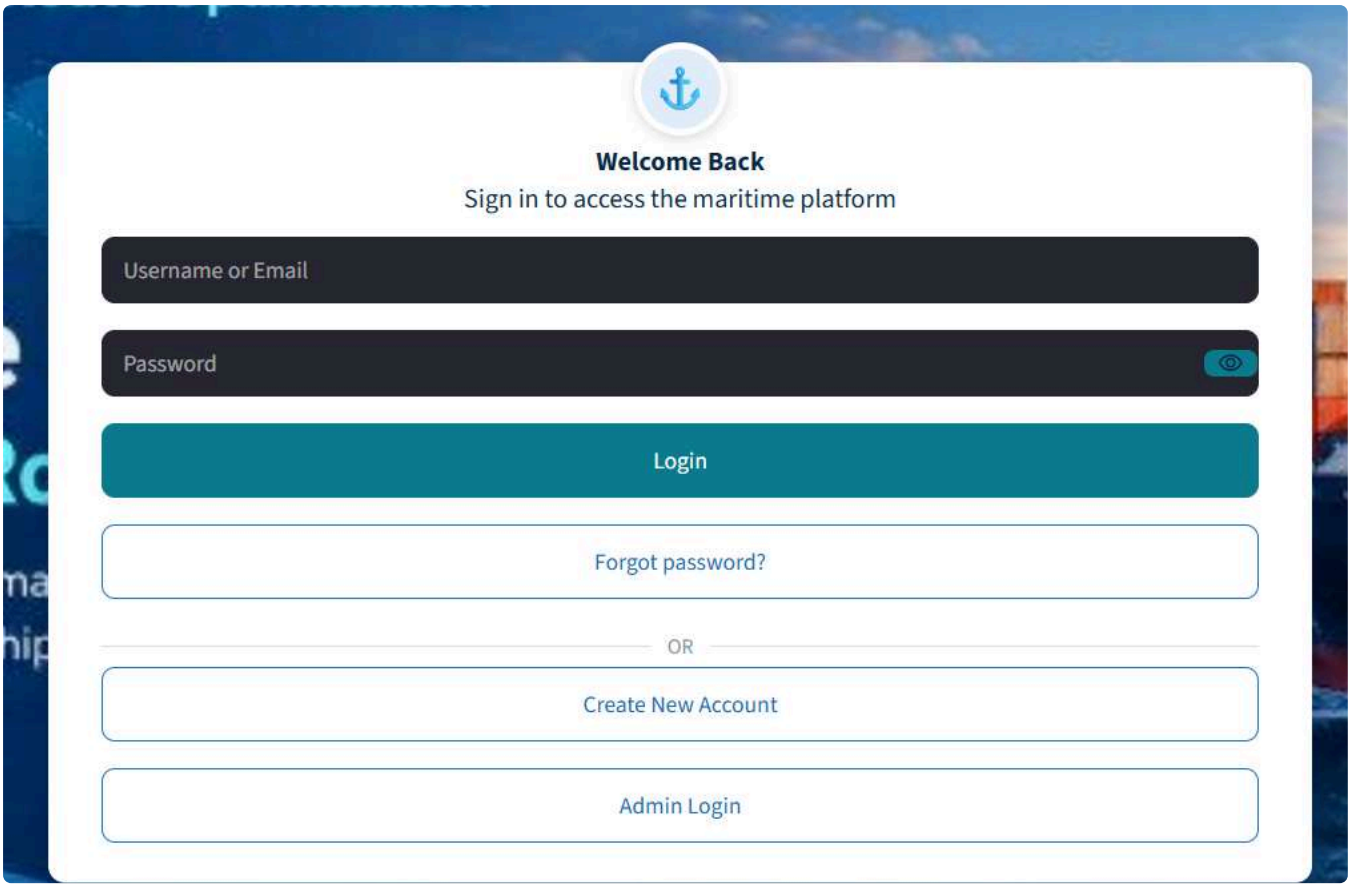

Streamlit, JWT, ngrok, Gmail SMTP (App Password), Google Colab

How to Run

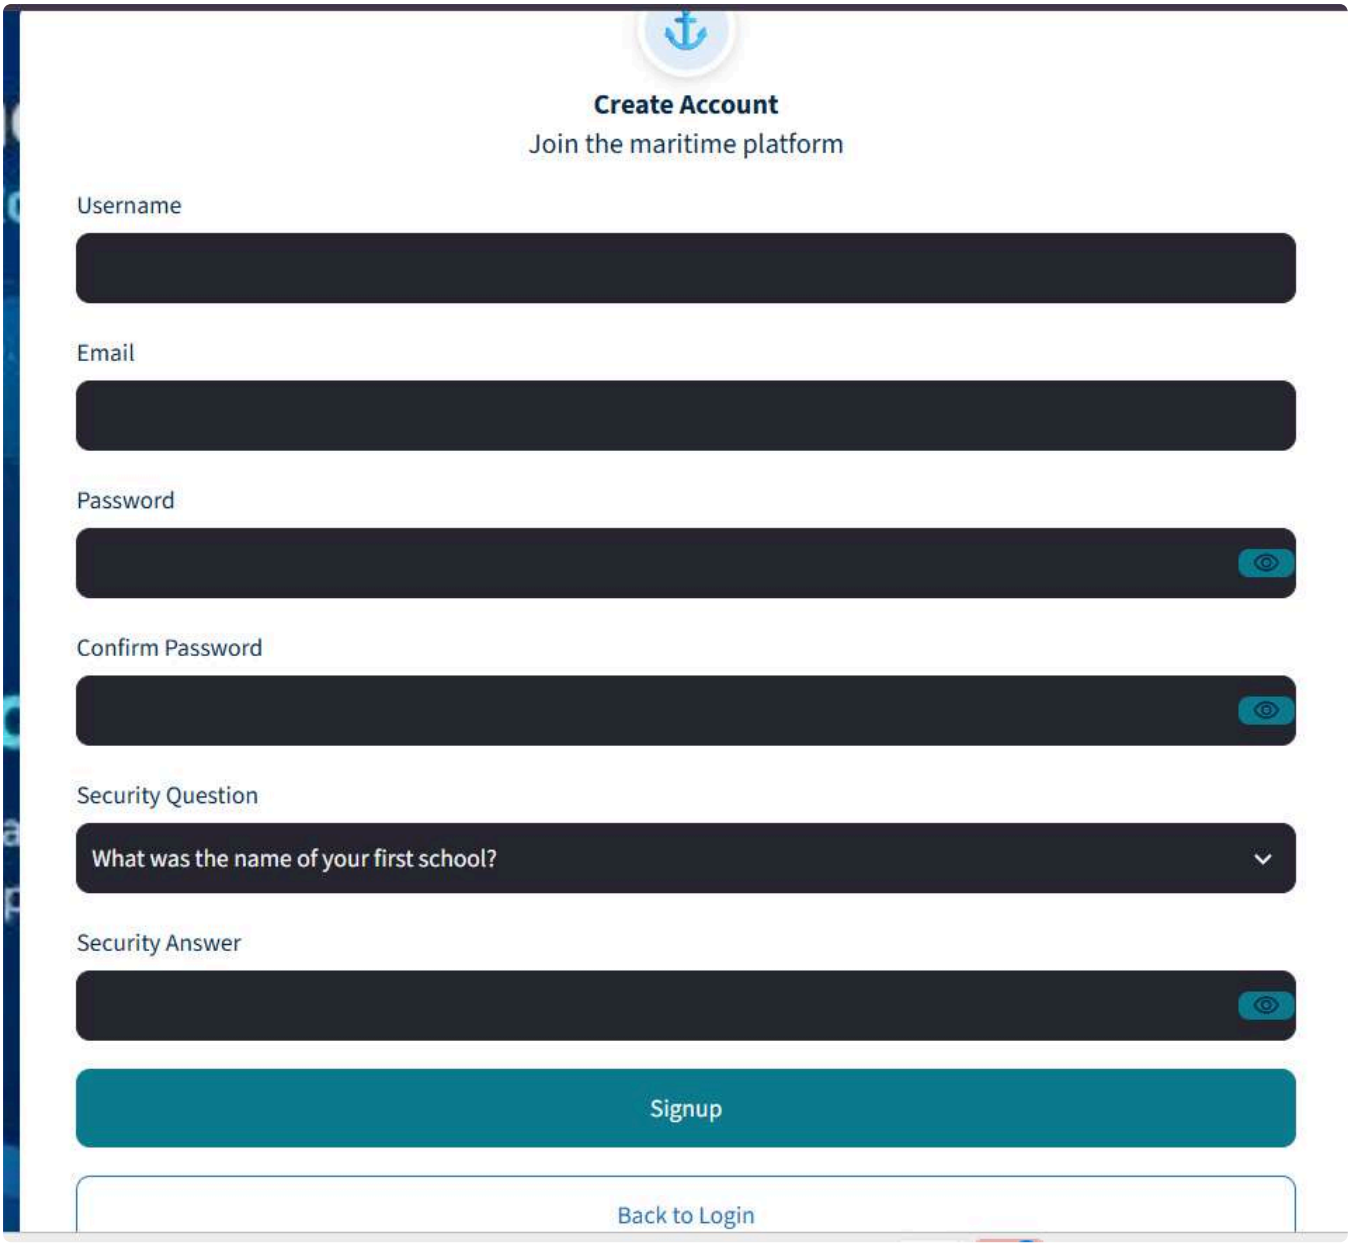

1. Open the notebook in Google Colab.
2. Add these Colab Secrets and turn on notebook access: JWT_SECRET, NGROK_AUTHTOKEN, EMAIL_ADDRESS, EMAIL_PASSWORD.
3. Run all cells from top to bottom.
4. Open the ngrok URL shown in the output.
